www.ukcoonline.com 602-258-4822
March 20, 2009 marks the third annual National Native HIV/AIDS Awareness Day (NNHAAD). This day is an opportunity to raise awareness about the impact of HIV/AIDS on Native people. HIV continues to increase among Native people as it has over the past decade. American Indians and Alaska Natives (AI/AN) had the third highest rate per 100,000 persons (above Whites) of AIDS diagnoses in 2006, despite having the smallest population.

The purpose of this day is to: 1) encourage Native people to get educated and to learn more about HIV/AIDS and its impact in their community; 2) work together to encourage testing options and HIV counseling in Native communities; and 3) help decrease the stigma associated with HIV/AIDS. It is a time to reflect on those who have passed as well as those who are currently infected and affected by HIV/AIDS - a “Celebration of Life” for all Native people.

Because NNHAAD is a nationwide effort, the National Native Capacity Building Assistance (CBA) Network that consists of: NNAAPC (National Native American AIDS Prevention Center), CA7AE: HAPP (Commitment to Action for 7th-Generation Awareness & Education: HIV/AIDS Prevention Project), and ITCA (Inter Tribal Council of Arizona, Inc), has made a “Call to Action” to Native people across the United States to participate in this effort. This call is to ensure Native communities realize that the epidemic is growing and to engage them in the prevention of and education about HIV and AIDS.

Please join us on this important day by organizing events in your local community. You can do this by handing out NNHAAD Save the Date cards at community events and organizations in the days leading up to Awareness Day; putting up Awareness Day posters in clinics, schools, wellness centers or other community locations; and most importantly by organizing a local activity to raise awareness about HIV/AIDS in your community on NNHAAD. This guide will assist you in planning and implementing your event. We have even included templates that can be used to develop your own press release so that you can inform your local newspaper, radio-station or other local media outlets of NNHAAD and about the intent of your local event.
This National Native HIV/AIDS Awareness Day (NNHAAD) Toolkit will help you and your organization prepare for the launching of your local NNHAAD event and assist you in the evaluation of your efforts.

The following items have been included for your use:

**PowerPoint Presentation Slides:** To help you generate local interest in your NNHAAD event and other HIV prevention activities. The presentation describes the inception of NNHAAD, the reasons for NNHAAD, and activities that can be completed in honor of NNHAAD.................................................................5

**HIV/AIDS Fact Sheet:** The most current (October, 2008) HIV statistics on American Indians, Alaska Natives, and Native Hawaiians that document the HIV epidemic. These statistics may be used as talking points for media and community leaders........................................................................................................10

**Awareness Day Activities Sheet:** Lists activities that can be used to brainstorm ideas. Should you need support or technical assistance with these activities, please contact any of the three National Native CBA Network Partners - NNAAPC, CA7AE: HADD, or ITCA...........................................................................................................11

**Media Involvement Overview:** Covers tips for the development of a Media/Social Marketing Plan and also includes Examples of Media Social Marketing Plans and Examples of Media Events and Activities.............................................13

**Nationwide Community Events Map Entry Form:** Complete and submit this form in order to add your event to the 2009 NNHAAD Nationwide Community Events Map and receive nationwide exposure..............................................................................17

**Photo Release Form:** Should be taken with you for signatures should you choose to publish or post any photos of event participants at a later time.................................................................18

**Media Talking Points:** Showcase various guidelines and examples to assist with media engagement....................................................................................................19

**Press Release:** Press Release Template and Example of Press Release are included and can be used to announce your NNHAAD event through local newspapers and Tribal, Village or Island newspapers and publications, public health listservs and web sites...........................................................................................................20
Public Service Announcement: Can be recorded and produced by you or a youth or prominent community member. The exposure on local radio stations, Tribal, Village or Island radio stations, or public health web sites may increase support and awareness of NNHAAD as well as the impact of HIV in Native communities..............................23

NCAI Resolution Example: This document offers an example of formalized support of NNHAAD that can be adapted to gather support and increase recognition of NNHAAD with your community, Tribal, Island or Village leaders..............................................................24

Tribal Resolution Template: Can be adapted and utilized to approach your Tribal, Island or Village leaders about formalized support of NNHAAD.................................................26

City Proclamation Template: Can be used to gather formalized support for NNHAAD from your local city council or mayor.................................................................................27

Post-Event Activities: Includes a Post-Event Activities Checklist and Post-Event Activities Evaluation Survey...........................................................................................................28

NNHAAD Products: Includes examples of 2009 NNHAAD products..........................30

NNHAAD Contact Information: Includes a valuable list of contacts.........................31
About NNHAAD

“A Celebration of Life”

- On this day, we encourage all Native communities across the United States to plan events to educate and test as well as to honor those who are infected and affected by HIV/AIDS or who have passed as a result of AIDS.
- This Awareness Day will challenge Native people to work together in harmony, to create a greater awareness of the risk of HIV/AIDS in our communities. It is also a “Celebration of Life” for all Native people.

Impact of HIV/AIDS in Native Communities

- Historically, Native Communities have experienced higher rates of numerous health disparities than any other racial/ethnic group including HIV/AIDS.
- American Indians, Alaska Natives and Native Hawaiians are at a greater risk for HIV infection because of the co-factors that present both health and economic challenges.
  - These include Sexually Transmitted Infections, Poverty, Alcohol Abuse, Intravenous Drug Use, and Social Co-Risk Factors (Homophobia, Mistrust/Distrust, etc.)

HIV/AIDS Statistics for Native Communities

- [Graph showing reported AIDS cases from 1985 to 2006]
HIV/AIDS Statistics for Native Communities

- In 2006, American Indian/Alaska Natives ranked 3rd in AIDS diagnosis at a rate of 14.6 per 100,000 [1].
- Currently, the report for cumulative HIV infection (not AIDS) for AI/AN males is 907 and for AI/AN females 397 [2].
- Unfortunately, due to national reporting limitations, data presented for Native Hawaiians is only for the state of Hawaii.
  - As of December 30, 2007, Hawaiian and other Pacific Islanders account for 13% (382) of the total reported AIDS cases in Hawaii [3].

*Based on new released estimates on HIV/AIDS data for ethnic groups, however, not all categories have been updated in this release. The new estimates are based on 22 states confidential name-based HIV reporting.

2008 Celebrations across the Nation

- Types of Events held:
  - Presentation/Seminars
  - Information Booths
  - Workshops
  - Wellness Fair
  - Drum Circle
  - A Walk or Run
  - Casino Night
  - Drag Performance
  - Sunrise Ceremony
  - Basketball Tournament with free HIV testing

Community Voice

- "I think it's a good first step in opening the conversation of HIV prevention and making it a comfortable topic rather than something to be feared. Education is key!"
- "We had an incredible impact. Our event was the first in the community, and we worked to bring elders and teens together at the same time [during] our presentation."
- "In providing the event, it was an opportunity to provide information about the day to Native community members and to inform them that there was a day recognizing Native people."
Community Voice

• “The Sunrise Ceremony provided spiritual grounding through prayer, song, and dance to the beginning of the day while the Breakfast Program brought to light the impact of HIV/AIDS on Native people and the importance of HIV testing. In addition, the honoring ceremony at the breakfast program helped reduce HIV and homophobia stigma.”

• “…it brought awareness to the entire staff about the National Native HIV/AIDS Awareness Day. It also was an opportunity to collaborate with Native and non-Native HIV organizations.”

Community Voice

• “Great awareness, many community members have been inquiring about when the next testing day is because they could not be at the first one. This was the first testing event like this in our state in 8 years.”

• “I feel those in attendance gained a lot of knowledge and took home educational information to share. We did do a question and answer session after which had great participation. I feel all had a good time and will bring others to attend next year.”

• “We look forward to creating a better event next year reaching more individuals in our community.”

NNHAAD Products

Resources

The National Native Capacity Building Assistance (CBA) Network

National Native American AIDS Prevention Center (NNAAPC)

CA7AE: HIV/AIDS Prevention Project (CA7AE: HAPP)

Inter Tribal Council of Arizona, Inc. (ITCA)
Who We Serve

All CBA Network Partners provide services to Native populations (American Indians, Alaska Natives and Native Hawaiians).

This also includes organizations that serve Native populations such as Community Based Organizations (CBOs), State Health Departments, Tribal Health Departments, Native Health Boards/Consortia, and other CDC funded CBAs.

National Native American AIDS Prevention Center (NNAAPC)

Provides CBA support in two areas of HIV prevention through organizational and curriculum development.

CBA is provided to organizations serving Native communities, health departments and other agencies with Native constituencies using the CDC’s evidence-based HIV interventions. CBA is provided through one-on-one consultations, site visits, regional trainings, and clearinghouse information.

For more information, contact NNAAPC at (720) 382-2244 or visit www.nnaapc.org

CA7AE: HIV/AIDS Prevention Project (CA7AE: HAPP)

Provides CBA to strengthen community access to and utilization of HIV prevention.

CA7AE: HAPP uses the highly successful Community Readiness Model to improve the capacity of Native communities and organizations serving Native populations by developing strategies and action plans consistent with readiness levels to increase efforts for HIV testing and prevention.

For more information, contact CA7AE: HAPP at (800) 642-0273 or visit www.happ.colostate.edu

Inter Tribal Council of Arizona, Inc. (ITCA)

ITCA’s National STD/HIV/AIDS Prevention Program provides tailored CBA to increase Native representation on community planning groups (CPGs), tribal health consortia, and individual planning groups to achieve and ensure Parity, Inclusion and Representation (PIR) of American Indians/Alaska Natives and Native Hawaiians in HIV planning efforts.

For more information, contact ITCA at (602) 258-ITCA or visit www.itcaonline.com

HIV/AIDS AMONG AMERICAN INDIAN AND ALASKA NATIVE POPULATIONS

• Since the beginning of the epidemic through 2006, it is reported that 3,235 American Indians and Alaska Natives (AI/AN) have AIDS. [1]*
• In 2006, there was an estimated 2,119 AI/ANs living with HIV/AIDS. However, the number of AI/AN people living with HIV/AIDS may actually be higher than noted.[1]*
• In 2006, the cumulative reported HIV infection (not AIDS) cases for AI/AN males is 907 and for AI/AN females is 397. [1]*

HIV/AIDS AMONG NATIVE HAWAIIAN POPULATIONS

• Data for Native Hawaiians (NH) are typically included in the category “Asian/Pacific Islander.” Because of this misclassification, data for Native Hawaiians is difficult to classify.
• Due to national reporting limitations, the data presented for NH is only for the state of Hawaii. Hawaiian/Other Pacific Islander represent 8.5% of Hawaii’s population and account for 13% (382) of the total reported AIDS cases. [2/3]
• During a 5 year average (2003 - 2007), the rate of AIDS cases for Native Hawaiians/Part Hawaiians was 10.0 per 100,000 compared to Hawaii’s total rate of 7.8 per 100,000. [3]

HIV/AIDS COMPARED TO OTHER ETHNIC GROUPS

• AI/ANs have had the 3rd highest rate of HIV/AIDS diagnosis for the past three years. In 2006, the rate for AI/AN was 14.6 per 100,000 persons, compared to 83.7 for Black, 29.3 for Hispanics, 11.5 for Whites, and 10.3 for Asian/Pacific Islander. [4]
• Of persons who were diagnosed with AIDS during 1998 - 2005, AI/ANs had that shortest overall survival rate. [1]*
• At the end of 36 months, AI/ANs had survived at 75% compared to 82% for Blacks, 87% for Whites, 88% for Hispanics, and 90% for Asian/Pacific Islanders. [1]*

* CDC has released new estimates on HIV/AIDS data for ethnic groups, however, not all categories have been updated in this release. Therefore, the previous 2006 CDC surveillance report is being used where indicated. The new estimates are based only on 22 states with confidential name-based HIV reporting and released on 08/08.

March 20, 2009 - A Celebration of Life

In many Native cultures around the country, the cycle and celebration of life are defined by the change in seasons. Ceremonies are held to recognize the changing of one season to another. Each of the four seasons have a special meaning, yet Spring, in particular represents a time for new beginnings. As March 20th marks the beginning of Spring in the Northern Hemisphere, Native communities from around the nation have selected this day to commemorate the annual National Native (American Indians, Alaska Natives, and Native Hawaiians) HIV/AIDS Awareness Day.

What you can do to recognize National Native HIV/AIDS Awareness Day

Protect Yourself

• Get tested for HIV! It’s important to know your status in order to protect yourself and those you care about.

• Talk privately with your health care provider or doctor about your HIV risks.

• Learn about HIV risks associated with unprotected sex and drug/alcohol use.

• Contact your local HIV/AIDS service organization, state/local health department or tribal health department for safer sex information.

Educate Others

• Organize a meeting with friends, neighbors, or other concerned community members to discuss drug and health issues in your community – together, people can make things happen!

• Post fact sheets about HIV/AIDS on bulletin boards, in local newspapers and web sites

• Remember that networking is an important factor for prevention!

Be a Friend and a Leader

• Talk to your community or spiritual leaders to gain their support for HIV/AIDS prevention and ask them to consider talking about HIV throughout the community in an effort to stop the stigma associated with the disease.

• Volunteer at a local HIV/AIDS organization.

• Help someone living with HIV/AIDS by being a friend.
National Native HIV/AIDS Awareness Day

HIV/AIDS ACTIVITIES SHEET

American Indians, Alaska Natives, and Native Hawaiians

In Your Community (Rural or Urban)

- Hold an educational session in a local community center or school. Talk openly and honestly about HIV/AIDS prevention and treatment, but be sensitive to the people who are present.

- Hold a town hall meeting to discuss your community’s risk for HIV.

- Sponsor a luncheon with community members, or sub-groups, to discuss HIV, STDs and other issues affecting the health and well-being of your community. It’s a great way to get ideas, guidance, and support.

In Your Tribe

- Call for a Tribal, Village or Island Resolution or Proclamation to commemorate National Native HIV/AIDS Awareness Day. Acknowledge “Resolution #SAC-06-002” that passed through the National Congress of American Indians 2006 Annual Session in Sacramento, California.

- Partner with your local AIDS service organization to hold an awareness day event that is Native specific.

How can you get help to organize an Awareness Day activity?

Contact any of the following agencies for help with brainstorming and organizing events for your community. Materials can also be requested by contacting the agencies listed below.

National Native American AIDS Prevention Center (NNAAPC)

The National Native HIV/AIDS Awareness Day is made possible with funding and support by the Centers for Disease Control and Prevention (CDC).
MEDIA INVOLVEMENT OVERVIEW

Tips for Creating a Media/Social Marketing Plan

What is a Media/Social Marketing Plan?
• It is the use of media marketing techniques to create a plan that will help influence your community members to make healthier behavior changes for the benefit of the entire community. In this case, to make healthier behavior changes around HIV/AIDS.

Why use a Media/Social Marketing Plan?
• To raise awareness and educate
• To encourage testing and early detection of HIV/AIDS
• To decrease/eradicate stigma
• To increase community support for prevention and testing

What are your Media/Social Marketing goals?
Example of goals could be:
• Use social marketing strategies to help increase the knowledge of local statistics related to HIV/AIDS, signs and symptoms, treatment options, support and testing resources
• Increase awareness of HIV/AIDS services that currently exist, how to access them and how to utilize them
• Reduce stigma associated with HIV/AIDS
• Educate communities that the health needs of those living with HIV or AIDS are best met through community systems working together

Who is your audience?
• Educators
• HIV/AIDS Providers
• Social Service Providers
• Native Administrators/Community Leaders
• Health Care Professionals
• Families, Individuals
• Community at large
• Specific Subpopulations: youth, gay or Two-Spirit population, elders, etc.
What message do you want to promote and to which audience?
• Be clear and concise in your message
• Use a catch phrase that is easy to remember and/or encompasses local culture
• Make certain your message is accurate and any data used are correct and citable – use the fact sheets to compile your data or be sure to get a reliable source to maintain credibility

What are the best modes of communication to reach your audience?
• Press Release
• Public Service Announcements (PSA)s
• Television Advertisement or News Spot
• Email
• Mailed Flyers and Newsletters
• Posters and Print Media
• Tribal Newspapers
• Local Newspapers
• Island Newspapers
• Internet/Web Sites
• Social Networking Sites
• Blogs
• Pamphlets/Brochures
• Awareness Day Gift Items (pencils, pens, key chains, etc.)
• Word of Mouth
• Speakers Bureau
• Other: _________________________________________

EXAMPLES OF MEDIA EVENTS AND ACTIVITIES

• Encourage your Indian Education Programs, schools and Native youth groups to sponsor essay, poetry, and/or poster contests on the specific celebration.

• Approach your Native leadership council or city mayor to sign a resolution or proclamation in support of National Native HIV/AIDS Awareness Day and announce this proclamation to their constituents.

• Convene a town hall meeting and invite local health care providers, Native leaders, educators, community and cultural leaders, elders, and the general public to engage in a dialogue about the impact of HIV/AIDS in the community. Invite Native people living with HIV/AIDS to share their personal stories and experiences. Hold a reception for participants immediately following the town hall meeting.

• Highlight the observance of NNHAAD in your Native and clinic newsletters and on listservs, bulletin boards, or web pages used by your community members.

• Submit an HIV/AIDS awareness editorial or a letter to the editor to all of your Native and/or local newspapers. You may want to use or tailor the sample talking points in this Toolkit to address the specific needs within your community.

• Encourage your Native and/or local radio stations to broadcast PSAs leading up to NNHAAD in an effort to increase HIV/AIDS awareness. PSA scripts are included in this Toolkit or pre-recorded PSAs may be downloaded from www.AIDS.gov.

• Ask your Native leadership council to send a letter/memorandum to all Native members about National Native HIV/AIDS Awareness Day, and to inform them of available HIV services (e.g., HIV testing and/or counseling sites).

• Contact Native and local newspapers, television, and radio stations to encourage them to develop a story on the impact of HIV/AIDS in your community and/or let them know of your availability to be interviewed.

• Contact your local television and radio stations to participate as a guest on locally produced “morning” shows and/or radio call-in shows.
The National Native Capacity Building Assistance (CBA) Network (National Native American AIDS Prevention Center [NNAAPC], Commitment to Action for 7th-Generation Awareness and Education: HIV/AIDS Prevention Project [CA7AE: HAPP], and Inter Tribal Council of Arizona, Inc. [ITCA]) is honored to release the 2009 NNHAAD Nationwide Community Events Map. This online map was created to publicize events taking place across the country in recognition of National Native HIV/AIDS Awareness Day.

The site features links to individual state maps that showcase events taking place on or near March 20. Event information will include details of the event, time, and location. To submit your event, please complete the following form and send it to any of the three CBA network partners. Provide information in all of the required fields as incomplete entries cannot be included on the map. Deadline for submission is March 13, 2009.

To view the map, please visit: http://www.nnaapc.org/news/nnhaadmap2009/nationwide.htm

The HIV and AIDS epidemics in Native communities are complex issues that are difficult to convey in a few brief sentences. However, involvement of the media is important and essential to convey our key messages concisely. Below are a few central messages that should be included in your encounters with the press.

It is helpful to identify the key messages that eloquently convey the important points about your message. You can do this by writing down your responses to the following questions:
• What is the problem and what documents it as a problem?
• What are some solutions, short term and long term?
• What action do you want?

Sample Media Talking Points for NNHAAD

**Problem:** HIV and AIDS are growing fast among American Indian, Alaska Native, and Native Hawaiian people. Though we have the smallest racial/ethnic population, we have the third highest rate per 100,000 persons of AIDS diagnoses. Few Native communities are aware of the magnitude of the HIV and AIDS threat to their communities.

**Solution:** National Native HIV/AIDS Awareness Day is the first day of Spring each year. It is a time for American Indian, Alaska Native, and Native Hawaiian communities and our supporters to raise awareness of the devastating effects HIV and AIDS have on Native communities. (If you are in a face to face meeting with the media, you may want to distribute fact sheets with your talk).

**Action:** Please join the combined efforts of Native communities and supporters across the nation in raising awareness about HIV/AIDS risk by helping to encourage:
• HIV testing and knowing your status, or
• Learning more about HIV/AIDS, how to protect yourself and your community, or
• Organizing a National Native HIV/AIDS Awareness Day event to raise awareness in your community

Any or all of these three actions can be used to enhance your Media Talking Points. Keep in mind that it is important to keep the action message short and simple.

Create your own Media Talking Points:
**Problem:**
**Solution:**
**Action:**
By sending a media advisory to local media outlets (newspapers, radio stations, or TV stations) you are alerting them to an important event on which they should report. This advisory lets them know the who, what, when, where and why of your event. If they are alerted early enough, it will allow them to assign someone to cover your event. This can lead to an article or story in your local newspaper.

You should send the media advisory to arrive 5-15 days in advance of your event. Some agencies send advisories out 30 days in advance. Follow-up with a phone call the day before the event to encourage them to cover it and answer any questions they have.

When you call, be ready with information about your event. Tell them how important your event is to the community, what you hope to accomplish, how many people you hope to reach and how their agency can play a vital role in making sure the community hears your message.

**PRESS RELEASE TEMPLATE**

For Immediate Release Contact: [contact person’s name]
[Insert date of release] Phone: [contact person’s phone]
Fax: [contact person’s fax]

**MEDIA ADVISORY**

“[Insert name of community] observes National Native HIV/AIDS Awareness Day.” March 20, 2009 marks the third annual National Native HIV/AIDS Awareness Day, which is being observed by Native people and Native serving health organizations.

*Who and What:* The [insert name of Tribe, program, etc.] will hold [insert name of event] to acknowledge the impact of HIV/AIDS in Native communities.

*When and Where:* The [insert name of event] will be held [insert location] at [insert time] on March 20, 2009.

*Why:* Explain why this is an important issue and an important event for your community.

For more information or to schedule an interview, please contact [insert name of contact person] at [insert phone number].

End press release with the marks: ###. This lets the journalists know the release has ended. If your release jumps to the next page, write “more” at the bottom and center it. At the top of the corner of the next page, write “Page 2” and provide a subject reference.
PRESS RELEASE

For Immediate Release

HEALTHY LIVING, HEALTHY CHOICES
EDUCATING NATIVE COMMUNITIES ABOUT HIV/AIDS

September 16, 2008 -- The National Native Capacity Building Assistance (CBA) Network (National Native American AIDS Prevention Center [NNAAPC], Commitment to Action for Seventh-Generation Awareness and Education: HIV/AIDS Prevention Project [CA7AE: HAPP], and the Inter Tribal Council of Arizona, Inc. [ITCA]) is announcing the launch of the 2009 National Native HIV/AIDS Awareness Day campaign.

National Native HIV/AIDS Awareness Day is a national mobilization effort designed to inform Native communities about the presence of HIV/AIDS in Native populations (American Indians, Alaska Natives, and Native Hawaiians). It is designed to encourage these populations across the United States and Territorial Areas to get educated, get tested and get involved in HIV prevention.

Historically, Native communities have suffered higher rates of numerous health disparities, including HIV/AIDS. For example, though American Indians and Alaska Natives (AI/ANs) account for only 1.5 percent of the U.S. population, in 2006 they had the 3rd highest rate of HIV/AIDS diagnoses at 14.6 per 100,000 persons*. Similar increases of HIV/AIDS infections have also been seen among Native Hawaiians. As of December 31, 2007, in the state of Hawaii, Native Hawaiians/Other Pacific Islanders represented 8.5 percent** of the total population yet they accounted for 13 percent of the total reported AIDS cases. It is important to note that accurate data is often difficult to obtain for all Native populations. This can lead to under reporting, with actual numbers being higher than current estimations. These increases in numbers may be linked to the devastating impact of the use of methamphetamine in some communities, a situation which often leads to unprotected sexual encounters.

(more)
To address HIV impact on Native communities, a collaborative effort has been made by the three Native CBA agencies, as part of a national initiative funded by the Centers for Disease Control and Prevention. The services provided are free to all Native communities and organizations serving Native populations. The National Native American AIDS Prevention Center focuses on strengthening organizational infrastructure and on adapting & training people on use of interventions for HIV prevention. CA7AE: HIV/AIDS Prevention Project, out of Colorado State University, focuses on strengthening community access to and utilization of HIV prevention services through support of local mobilization efforts. The Inter Tribal Council of Arizona, Inc. focuses on strengthening community planning for HIV prevention by increasing Parity, Inclusion, and Representation (PIR) of Native people in HIV planning groups.

For more information about our services or to request awareness day products such as posters, buttons, and “save the date” cards, please visit the following web sites: NNAAPC at www.nnaapc.org; CA7AE: HAPP at www.happ.colostate.edu; and ITCA at www.itcaonline.com. National Native HIV/AIDS Awareness Day is funded and supported by the Centers for Disease Control and Prevention.

To find an HIV testing site near you visit www.hivtest.org. To learn more about all the HIV/AIDS awareness days, please visit www.AIDS.gov.

*Statistics are based on new released estimates on HIV/AIDS data for ethnic groups, however, not all categories have been updated in this 2008 release. The new estimates are based only on 22 states with confidential name-based HIV reporting.

** Statistics are based on United States Census Bureau for 2007 American Community Survey – “One Race” under “Total Population.”

TOPIC/SUBJECT: 3rd Annual National Native HIV/AIDS Awareness Day
FOR USE: MARCH 2009
LENGTH: 30 SECONDS
VOICE: GREETINGS! AN IMPORTANT DATE IS COMING UP SOON. MARCH 20TH IS NATIONAL NATIVE HIV/AIDS AWARENESS DAY. ON THIS DAY, WE ENCOURAGE ALL NATIVE COMMUNITIES ACROSS THE UNITED STATES TO PLAN EVENTS TO SUPPORT HIV TESTING AS WELL AS TO HONOR THOSE WHO ARE AFFECTED BY HIV/AIDS OR WHO HAVE PASSED AS A RESULT OF AIDS. PLEASE JOIN US IN THIS VERY SPECIAL CELEBRATION OF LIFE. FOR MORE INFORMATION VISIT WWW.AIDS.GOV. TO FIND A TESTING CENTER NEAR YOU, VISIT WWW.HIVTEST.ORG. REMEMBER, ONE KEY WAY TO PROTECT OUR FUTURE, AND TO PROTECT OUR PEOPLE, IS TO TAKE THE TEST!
National Native HIV/AIDS Awareness Day

NATIONAL CONGRESS OF AMERICAN INDIANS

The National Congress of American Indians
Resolution #SAC-06-002

TITLE: Support the National American Indian, Alaska Native, and Native Hawaiian HIV/AIDS Awareness Day held on March 21, 2007

WHEREAS, we, the members of the National Congress of American Indians of the United States, invoking the divine blessing of the Creator upon our efforts and purposes, in order to preserve for ourselves and our descendants the inherent sovereign rights of our Indian nations, rights secured under Indian treaties and agreements with the United States, and all other rights and benefits to which we are entitled under the laws and Constitution of the United States, to enlighten the public toward a better understanding of the Indian people, to preserve Indian cultural values, and otherwise promote the health, safety and welfare of the Indian people, do hereby establish and submit the following resolution; and

WHEREAS, the National Congress of American Indians (NCAI) was established in 1944 and is the oldest and largest national organization of American Indian and Alaska Native tribal governments; and

WHEREAS, American Indians and Alaska Natives have long experienced lower health status when compared with other Americans that includes a lower life expectancy and higher disease occurrence than other racial/ethnic groups due to inadequate education, disproportionate poverty, discrimination in the delivery of health services, and access to adequate and quality health; and

WHEREAS, the spread of HIV/AIDS virus among American Indians, Alaska Natives, and Native Hawaiians poses a significant risk to the public health and well-being of these communities; and

WHEREAS, American Indians/Alaska Natives had the 3rd highest rate of AIDS diagnoses in 2004, despite having the smallest population; and

WHEREAS, through June 2004 the cumulative reported AIDS cases for American Indians/Alaska Natives was 3,084 and reported cases for HIV infection (not AIDS) was 1068; and

WHEREAS, data presented for Hawaiian/Part Hawaiian represent 8.6% of the Hawaii population and account for 11% (302) of the total reported AIDS cases as of June 30, 2005 and the proportion of Hawaiian cases has increased from 10.7% before July 1995 to 13% during the period from July 2000 – June 2005; and

WHEREAS, from 2000 through 2004, the estimated number of deaths among persons with AIDS decreased among whites, blacks, and Asian/Pacific Islanders but increased among American Indians/Alaska Natives; and
WHEREAS, American Indians and Alaska Natives constitute less than 1% of the total HIV/AIDS cases causing the disproportionate impact of this disease to garner national attention and public health effort; and

WHEREAS, the abovementioned rates and statistics are held suspect and are believed to be much higher than the true rates of infection and death which are underreported due to lack of access to medical diagnosis, misclassification, and/or poor reporting; and

WHEREAS, there is potential for a great increase of HIV/AIDS in American Indian, Alaska Native, and Native Hawaiian communities, as evidenced by several co-risk factors such as high rates of sexually transmitted disease in our communities (i.e. gonorrhea, syphilis, and Chlamydia), poverty, social stigma (i.e. discrimination, racism, homophobia), high substance abuse rates; and

WHEREAS, the status of HIV/AIDS epidemic among American Indian and Alaska Native people is a public health crisis that requires a focused national effort to bring attention to the prevention needs of American Indian people and to raise the awareness of the American public, the Administration, the Congress, and public health agencies of this issue.

NOW THEREFORE BE IT RESOLVED, that the NCAI does hereby support the National American Indian, Alaska Native, and Native Hawaiian HIV/AIDS Awareness Day in its efforts to bring tribal and national awareness of HIV/AIDS among Native peoples to prevent its spread and to encourage HIV/AIDS testing; and

BE IT FURTHER RESOLVED, that the NCAI encourages all Native, as well as national and regional Native organizations to work together to develop strategies and commit the necessary resources to bring this effort to fruition; and

BE IT FINALLY RESOLVED, that this resolution shall be the policy of NCAI until it is withdrawn or modified by subsequent resolution.

CERTIFICATION

The foregoing resolution was adopted by the General Assembly at the 2006 63rd Annual Session of the National Congress of American Indians, held at the Sacramento Convention Center in Sacramento, California on October 1-6, 2006, with a quorum present.

ATTEST:

[Signature]
Recording Secretary
WHEREAS, American Indians and Alaska Natives have experienced a long history of a lower health status when compared with other Americans which includes a lower life expectancy and higher disease occurrence than other racial/ethnic groups due to inadequate health education, disproportionate poverty, discrimination in the delivery of health care services and access to quality health care; and

WHEREAS, the spread of HIV/AIDS virus among American Indians, Alaska Natives and Native Hawaiians poses a significant risk to the public health and well-being of these communities, who have the third highest rate per 100,000 persons of AIDS diagnoses in 2006 of all racial/ethnic groups despite having the smallest population; and

WHEREAS, of all persons who had received a diagnosis of AIDS during 1998 – 2005, American Indians and Alaska Natives had survived a shorter time than any other racial/ethnic group while in the state of Hawaii, Native Hawaiians/Other Pacific Islanders represent 8.5% of Hawaii’s population yet account for 13% of the AIDS cases; and

WHEREAS, the above mentioned rates and statistics are held suspect and are believed to be much higher than the current rates of infection and death which are under reported due to lack of access to medical diagnosis, misclassification, and/or overall poor reporting; and

WHEREAS, there is potential for a great increase of HIV/AIDS in American Indians, Alaska Natives and Native Hawaiian communities, as evidenced by several co-risk factors such as high rates of sexually transmitted disease in their communities, poverty, social stigma, high substance abuse rates; and

WHEREAS, the status of HIV/AIDS epidemic among American Indians, Alaska Natives and Native Hawaiian people is a public health crisis that requires a focused national effort as well as tribal effort to bring attention to the prevention needs of Indigenous people and to raise awareness of the American public, the Administration, the Congress, and public health agencies on this issue.

NOW THEREFORE BE IT RESOLVED, the _________________________ Tribal Council supports March 20, 2009 as the National Native HIV/AIDS Awareness Day.

Executed the _____ day of ______________________, 20___, in regular session of the _________________________ Tribal Council by a vote of ____ yes _____ no, and _____ abstained.

Signed _________________________________
President/Chairperson of Tribal Council
WHEREAS, we, the ________________________________ do hereby establish and submit the following proclamation; and

WHEREAS, American Indians and Alaska Natives have experienced a long history of a lower health status when compared with other Americans which includes a lower life expectancy and higher disease occurrence than other racial/ethnic groups due to inadequate health education, disproportionate poverty, discrimination in the delivery of health care services and access to quality health care; and

WHEREAS, the spread of HIV/AIDS virus among American Indians, Alaska Natives and Native Hawaiians poses a significant risk to the public health and well-being of these communities, who have the third highest rate per 100,000 persons of AIDS diagnoses in 2006 of all racial/ethnic groups despite having the smallest population; and

WHEREAS, of all persons who had received a diagnosis of AIDS during 1998 – 2005, American Indians and Alaska Natives had survived a shorter time than any other racial/ethnic group while in the state of Hawaii, Native Hawaiians/Other Pacific Islanders represent 8.5% of Hawaii’s population yet account for 13% of the AIDS cases; and

WHEREAS, the above mentioned rates and statistics are held suspect and are believed to be much higher than the current rates of infection and death which are under reported due to lack of access to medical diagnosis, misclassification, and/or overall poor reporting; and

WHEREAS, there is potential for a great increase of HIV/AIDS in American Indians, Alaska Natives and Native Hawaiian communities, as evidenced by several co-risk factors such as high rates of sexually transmitted disease in their communities, poverty, social stigma, high substance abuse rates; and

WHEREAS, the status of HIV/AIDS epidemic among American Indians, Alaska Natives and Native Hawaiian people is a public health crisis that requires a focused national effort as well as tribal effort to bring attention to the prevention needs of Indigenous people and to raise awareness of the American public, the Administration, the Congress, and public health agencies on this issue.

NOW THEREFORE, I ___________________, MAYOR of the City of __________________ do hereby proclaim the people support March 20th 2009 as the National Native HIV/AIDS Awareness Day. I call upon the people of this city to observe this day with appropriate programs and activities.
POST-EVENT ACTIVITIES CHECKLIST

• After March 20, 2009, the National Native CBA Network will send out a NNHAAD Activities Evaluation Survey to your email address. Please watch for this survey and complete it. This survey collects data including the number of communities involved in NNHAAD, the types of activities that took place, community impact, and the events assistance provided by the Network. This information will create a database of all community activities so that the National Native CBA Network can share this information with Native participants and improve the following year’s NNHAAD activities.

• Prepare news releases to send to any media outlets that did not cover your event and include any photos from your NNHAAD event. See Photo Release Form (page 17) to obtain appropriate permission.

• Send thank you letters to leaders, community organizations, media outlets, speakers or others who contributed to or participated in your event.

• Ask the media for copies of the coverage of your event.

• Keep track of the leadership, media, community organizations and others that were invited so you can follow-up for next year’s activities.
The National Native CBA Network (NNAAPC, CA7AE: HAPP, and ITCA) greatly appreciates the work that you did to organize a NNHAAD event in your community.

Please take a moment to let us know about your activities on this important day.

1. Tribe or Organization Name:

2. Contact Information:

3. What activity or activities did you organize in your community? Please provide a brief description of your event.

4. How many people attended your event?

5. If HIV testing occurred, how many individuals received HIV counseling and testing services?

6. Did any media cover your event? If so, please provide an extra copy of the coverage for our Awareness Day files.

7. Do you have any photos of your event? If so, please provide an extra copy of the photos that we can have for our Awareness Day files. If you would like us to use your photos on any web sites or future materials, please provide a signed photo release of participants photographed.

8. Would you like to hold a similar event to observe NNHAAD next year?

9. What additional resources would be helpful for your event?

10. What could the National Native Capacity Building Assistance Network do to better assist you with planning your Awareness Day event next year?
